Reference: County Sanitation Districts of Los Angeles County  
Joint Water Pollution Control Plant (JWPCP)  
Secondary Treatment Facilities  
Reactors & Clarifiers, Expansion Stage III

Daniel Mechanical, Inc.

To Whom It May Concern:

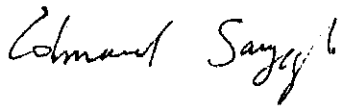

APC-T&K, JV, the general contractor for reactors and clarifiers expansion stage III in the JWPCP plant, is very pleased of Daniel Mechanical performance to fulfill its obligation.

Daniel Mechanical manufactured the FRP duct Exhaust System for the project's Odor Control Equipment including the scrubber vessels.

Daniel Mechanical, Inc. worked very well to prepare the required shop drawings and implement all necessary changes to suit the structure & equipment conditions. All of the specification requirements have been met. The materials were delivered on time to the job site, which allowed for the installation and testing of equipment on time. The prompt and professional responses to all of the project's needs contributed to complete the Odor Control System ahead of the project Mechanical Completion Milestone.

APC-T&K, JV and I personally have been pleased with the relationship with Daniel Mechanical, Inc. and looking forward to continuing our relationship over the coming years.

Sincerely,  
APC-T&K JV

Edmond Sayegh, P. E.  
Assistant Project Manager
