RE: Point Loma WWTP Odor Control System

Dear Tim:

I am writing this letter to comment on your firm's participation in the fabrication and coordination of the new Odor Control and Chemical Metering System at the Point Loma Wastewater Treatment Plant. This 42,000 CFM system has a H₂S removal efficiency of 99%

The FRP ductwork, chemical storage tanks, & odor scrubbers were supplied by your company in a timely manner, and met or exceeded the material quality specifications. The dimensional tolerances required were met, and there were little or no fit up problems in the field. The technical support provided by you and your equipment vendors also greatly assisted during the startup process. This system was supplied within the project budget, and is now being operated by the City of San Diego Metropolitan Wastewater Department.

Once again, I would like to thank you for your participation in this project, and wish you and your firm continued success.

Sincerely,
CDM Engineers and Constructors

Edmund R. Mitiguy
