RAND COUDRAY, Principal Construction Engineer

Tim Malki
Project Manager
Daniel Mechanical
108 West C Street
Ontario, CA 91762

April 20, 1995

Dear Tim,

As supplier of the FRP odororous and fresh air conveyance systems at the Sacramento Regional Wastewater Plant, Daniel Mechanical, Inc. contributed greatly to the successful completion of the odor removal system phase of the Gravity Belt Thickener project.

Daniel Mechanical, Inc. provided a premium quality product and expert technical (especially through Daniel Olson) support during all, often complex, phases of the installation. Your willingness to respond to changing field conditions with an 'anything you want' attitude solved a number of design problems and precluded District/contractor relation problems. Your crew's knowledge and experience were invaluable. When requested to repair a damaged scrubber, provided through another manufacturer, you crew responded expeditiously and effectively.

The District recognizes Daniel Mechanical, Inc.'s commitment to excellence. We commend your performance and welcome the opportunity to work together in the future.

Sincerely,

A handwritten signature in cursive script that reads "Cliff Watson".

Cliff Watson
Resident Engineer
