RE: New Scrubber Vessels

Dear Mr. Malki:

I am writing regarding the installation and operation of the new air scrubbing equipment supplied by Daniel Mechanical, Inc. I want to compliment you and your staff on the construction of the scrubbing system and the associated duct work that you supplied for the Phillipsburg Project. The parts were assembled in the field quite easily and required little modification.

The system has not experienced any problems throughout operation. The design specification of the scrubbing equipment was 50,000 CFM. The equipment has had no problems living up to this specification.

It has been a pleasure to work with you and your staff on this project. I would not hesitate to purchase another system from Daniel Mechanical on future installations.

Sincerely,
Hydropress Environmental Services, Inc.

Tim Moyer
General Manager
