The Daniel Company
2185 E. 7th Street
Los Angeles, CA 90023

Subject: Placer County SMD-1 Ammonia Removal Project
Letter of Recommendation

To Whom It May Concern:

The Daniel Company provided both buried and above-grade custom-spoiled FRP ductwork and accessories for the Foul Air Exhaust System at our Placer County Sewer Maintenance District No. 1, Ammonia Removal Project. The custom FRP ductwork material that was furnished by the Daniel Company was of high quality and was accepted by our Client, Placer County.

Throughout the entire course of the project, the Daniel Company responded timely to our needs for submittal drawings, technical support, and the delivery of materials. In addition, Daniel's technical crew was promptly dispatched to the jobsite and successfully provided the required field services and training of our employees.

It was a pleasure working with the Daniel Company on this project, and we look forward to doing business with them again in the near future.
