**RE: Odor control Facility-Primary Settling Tanks-Sanitary Contract 6503,  
Backriver WWTP – Baltimore, MD**

**Subject: Letter of Recommendation**

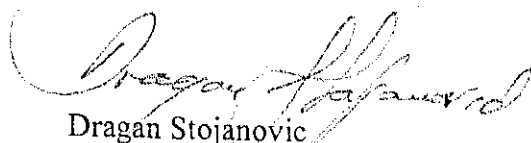

Dear Tim:

The Norair Engineering Corp. selected Daniel Mechanical to provide the three multi-stage odor control systems, FRP pipe, launder covers, and chemical storage tanks for Back River Wastewater Treatment Plant in Baltimore, Maryland. The approximate value of the Purchase Order was for \$1,200,000.00. As the supplier of the odor control systems, Daniel delivered a quality product in a timely manner and as such contributed to the successful implementation of installation and completion of this project. Additionally, Daniel Mechanical provided custom-made FRP launder covers for 10 Primary Settling Tanks. These were precisely sized, shaped and fabricated to minimize much of the difficulties typically associated with retrofit installations.

It has been a pleasure working with Daniel Mechanical and their staff throughout this project. We would not hesitate to recommend Daniel Mechanical as a reliable and successful manufacturer of odor control systems and welcome the opportunity to work with them again in the future.

Thank you,

NORAIR ENGINEERING CORP.

  
Dragan Stojanovic  
Vice President
