RE: Mesa Northwest Water Reclamation Plant Expansion

Subject: Letter of Recommendation

Dear Tim,

Please accept our congratulations in a successful startup and operation of your equipment on the City of Mesa Northwest Water Reclamation Plant Expansion project.

Your supply of the 60,000 CFM multistage wet odor control scrubber system complete with FRP duct, dampers, chemical storage tanks, control panel, fans and pumps not only came as a quality product, but was backed up with a high level of technical support.

The technical experience of your engineering staff was very much appreciated in troubleshooting normal startup issues as well as a prompt attention to service requests.

The odor control system met the specified performance tests of a 99.5% H<sub>2</sub>S removal efficiency.

PCL welcomes Daniel Mechanical as a successful contribution to any future project.

Sincerely,

A handwritten signature in black ink, appearing to read "Brent Kinser", written over a white background.

Brent Kinser
