RE: Hampton Roads Sanitation District Odor Control Projects

Dear Mr. Malki:

Pizzagalli Construction Company wanted to take this opportunity to thank Daniel Mechanical for a project well done. The recent completion and performance testing of your eight supplied scrubber systems went very well. For these scrubbers to operate at 99.9% efficiency at 29,000 cfm and 250ppm of H₂S gas is a notable achievement. Pizzagalli Construction Company feels that having Daniel Mechanical supply and install all duct, fans, re-circulating pumps and scrubber vessels with internals contributed to our joint success.

Pizzagalli Construction Company eagerly awaits the next opportunity for our firms to work together.

With respect,

David M. Kress
Project Manager
