Re: City of Mesa Baseline and Price Roads Odor Control System  
Mesa, AZ

To whom it may concern:

I wanted to take this opportunity to voice my appreciation for the performance on the above-mentioned project. This project started out on the wrong foot for us, and the timely service and continual support from William and Tim really helped the relations we have with the City, and to get this project turned to a positive situation for all parties. It has been a pleasure working with you and I look forward to doing business in the future.

Sincerely,

Bob Skiles  
Construction Manager
