RE: Phillipsburg, NJ N-Viro Solids Handling Facility Odor Control System

Subject: Odor Control System

Dear Tim:

Daniel Mechanical was selected as the preferred supplier of the 60,000 CFM Multistage Wet Packed Tower Odor Control Scrubbing System for the above referenced facility in Phillipsburg, New Jersey. The product was of premium quality and the service was professional. Daniel Mechanical's experience as an Odor Control System designer and manufacturer was evident throughout the project, particularly during the engineering submittal process and fabrication.

Daniel Mechanical provided the product per specification, on time and within the budget. The system continues to operate successfully. As a result, our client Hydropress Environmental Services, Inc. remains satisfied with the Odor Control System's overall performance.

Since the conclusion of this project, I would use Mechanical as a reliable source for our Odor Control needs.

We welcome the opportunity to work with you on other similar projects.

Sincerely,

Neil A. Webster, P.E.  
President
